

Grow with Google: Lesson 6

CSS Syntax Problem Set

1. Welcome to the Problem Set!

2. Quiz: Style an Image

- MDN [CSS Border Property](#)
- CSS-Tricks [Cursor Property](#)
- CSSMatic [Box Shadow Tool](#)
- No mention of border-radius.
- Image was not visible in quiz.
- Oops, I forgot the cursor.

3. Quiz: Style the Font

- No mention of shorthand.
- Font-family should be declared last in shorthand.
- Optional values should be declared before font-size.
- CSS-Tricks [Font Property](#)

4. IMPORTANT! Udacity Front End Feedback Extension

- Again?

5. Quiz: Writing Selectors

- Just occurred to me that we never covered HTML 5.

6. Quiz: Using Attributes

- MDN [Selectors](#)
- CSS-Tricks [How CSS Selectors Work](#)
- Once again, no image to reference.

7. Quiz: Slack Card

- Thought it was really cool to use the inspection tool for this.
- The instructions as "tests" that need to be "passed" is super helpful.
- Design requirements are essentially tests.

8. Quiz: Udacity Site Header

- Inspection tool quiz.

9. What is a Stylesheet?

- Stylesheets are more scalable than local styles.
- `<link href="address.css" rel="stylesheet">`
- When do they teach about the cascade?

10. Quiz: Link to a Stylesheet
